FX3-4-6-Series Top of Pole

FX90-120-168-Series Top of Pole

How to determine which rack to order: Scroll down the column on the left to find the photovoltaic make and model you will use.

Find the number of panels you plan to mount on the fixed rack in one of the vertical columns to the right.

Find the box at the intersection of the "PANEL TYPE" with the PV panel you will use and "# of PV PANELS" with the number of modules you plan to place on your rack. The "Model Number" (FX 3 - xx, FX4-xxx, FX6-x-xxx, FX-xx) of the rack to purchase will be in the box.

Order Examples: To order a rack for 3 Kyocera KC-130's, the model number is "FX 3 - 80 L". To order a rack for 14 Kyocera KC-85's the model number is "FX 120" and will require an extra rail set.

For FX-90, 120, & 168 Top of Pole Mount Fixed Racks : Add the following to the cost of a fixed rack -
 *Extra Rail Set Required - \$260 ** 2 Extra Rail Sets Required - \$520 *** 3 Extra Rail Sets Required - \$780
 Fixed racks with Heavy Duty Rails are available for \$520 per set (2 rails)

Shipping: All FX 3 & 4, & most FX-6 Series Fixed Racks may be shipped by UPS.

FX-90, 120, and 168 racks must be shipped by a freight carrier.

Larger Fixed Racks: Our chart only shows up to 16 panels mounted because that handles the majority of our racks. Larger racks that hold approximately 168 sq. ft. of solar modules are available.

POLE INSTALLATION DETAIL

Recommendations for Installation: It is the installer's responsibility to consider the soil conditions and location, when setting the pipe. A general rule of thumb for pole installation is 2/3 pole length above ground 1/3 pole length in the ground in a hole at least three times the diameter of the pole filled with concrete.
